1. In view of the lack of any art rejection against claims 1, 27 and 31 which are generic to figures 1-5, the restriction requirement of 10/29/2008 is withdrawn.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 7, 8, 11, 12, 22, 23, 29 and 30 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 5, 6, 9, 10, 20, 21, 27 and 28 of copending Application No. 10/542,840. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented. Application '831 claims 1, 27 and 31 are equivalent to '840 claims 1, 25 and 29 with the exception of the '831 claims calling for a "movable wall" and the '840 claims calling for a "flexible wall" in claim 1 and an "expandable wall" in claims 25 and 29. However, the term "movable wall" is a broad generic term that includes expandable and flexible walls. Additionally, since the dependent claims in both applications are identical and further define the walls to be either a balloon, a bellow or a bag, one of ordinary skill in the art would recognize that the walls of either the balloon, the bellows or the bag of '831 claims 5, 6 or 9 are

also either flexible or expandable as called for in '840 claims 1, 25 or 29 and would also recognize the term "movable" to be a broad generic term that included "flexible" and "expandable" as called for in the '840 application. Therefore, the dependent claims in the '831 application that further define the movable wall to be either a balloon, a bellow or a bag are defining the same invention as the corresponding dependent claims in the '840 application that further define either the flexible or expandable wall to be either a balloon, a bellow or a bag.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory

double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-27 and 29-31 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25 and 27-29 of U.S. Patent No. 10/842,840. Although the conflicting claims are not identical, they are not patentably distinct from each other because application '831 claims 1, 27 and 31 are equivalent to '840 claims 1, 25 and 29 with the exception of the '831 claims calling for a "movable wall" and the '840 claims calling for a "flexible wall" in claim 1 and an "expandable wall" in claims 25 and 29. However, one of ordinary skill in the art would consider the terms "movable wall", "flexible wall" and "expandable wall" to be synonyms that describe similar and not patentably distinct structures.
